SIGMA SYSTEMS INCREASES PRESENCE IN EUROPE, MIDDLE EAST, AFRICA

Appointment Of Leading Executive Underlines Sigma's EMEA Ambition

TORONTO December 15, 2005 Increasing its European presence, Sigma Systems, (www.sigma-systems.com), a leading provider of service management OSS solutions, delivering next-generation services on IP broadband and wireless networks, has opened a new headquarters in London, and appointed Stephen Davids as Vice President Europe, Middle East, Africa (EMEA). This European effort serves as an expansion of its current base for sales, business development and customer support for Sigma Systems, which already counts a number of European operators among its customers.

The worldwide demand for our solutions, our growing partner relationships and the level of continued involvement with our current customers is driving amazing growth and fueling accelerated product development, said Tim Spencer, President of Sigma Systems. This is a very exciting time for us as a company and we're pleased to have Stephen Davids join us to lead our expansion plans in EMEA. We believe that the coming months will be an explosive growth period for the region's mobile and fixed-line communications industries, as well as Sigma.

Stephen Davids brings over 25 years industry experience to Sigma, having held senior executive management roles at CoManage and Cable and Wireless among others. Prior to joining Sigma, Stephen was Managing Director for CoManage, an OSS vendor, where he was responsible for building the company's EMEA operations from start-up to market leader before its eventual sale.

Stephen and his team will be responsible for expanding and continuously developing a strong and satisfied client base in EMEA both directly and with new partners. He'll also play a key role in increasing the awareness of the Sigma brand in the region with the full support of Sigma's global team of 170 professionals in North America and Asia Pacific, said Spencer.

Stephen has a unique understanding of how to solve some of the key business and technical challenges facing EMEA's communications service providers (CSPs). Sigma is excited about the expansion of its EMEA operations, which will make it easier for customers in the region to access Sigma's services and solutions.

Sigma's signature Service Management Platform (SMP) provides CSPs with the industry leading OSS solutions for voice (GSM/CDMA, VoIP, SIP), video (IPTV, DTV, ITV, VOD, PPV), data (DSL, Cable HFC, mobile and fixed wireless data), and service delivery platform (SDP) support for next-generation, real-time services using 3G-IMS-based network technologies and related application delivery systems. SMP, which is powered by real-time intelligent service control engine ServiceBroker, is a J2EE-based solution that is NGOSS and OSS/J compliant.

The Sigma Portfolio of OSS service management products is used for

delivering mobile services on GSM or CDMA networks, as well as IP broadband services on cable and fixed-line networks. The portfolio encompasses a broad array of functions including order management, service provisioning and activation, resource management and service authorisation, as well as subscriber self-service and customer care service diagnostics functionality.

◆ Competitive, regulatory, technological and financial challenges are combining to inhibit the profitability of EMEA CSPs, ◆ said Stephen Davids. ◆ CSPs need to increase revenue streams and reduce time-to-market for new services without increasing their operational costs. Our EMEA expansion will help them do exactly that. ◆

Sigma ◆'s new European office is located near Guildford Surrey - contact +44 1252 851871 or corporateinfo@sigma-systems.com

About Sigma Systems

Sigma Systems is a premier provider and leader in the design, development and deployment of OSS service management solutions. As a global company, we automate Communications Service Providers ◆ (CSPs) business and operational processes enabling them to define, activate, manage and diagnose subscribed, on-demand and real-time IP broadband and wireless services.

Our award-winning software solutions help deliver voice, data/internet, video and advanced multimedia services - anywhere, anytime. These solutions position CSPs to decrease time to market, lower operational costs, increase their ability to deploy new revenue generating services, decrease customer care costs while empowering subscriber service personalization through self-care functionality.

Sigma has 10 years experience using a proven implementation methodology that provides rapid deployment integration and turn-up in multi-service, multi-technology operating environments. Today, we are proven global OSS leader by managing our CSP customers who manage over 40 million combined in North American, EMEA and Asia Pacific deployments.

Sigma ◆'s tried, proven and trusted deployments are powered by its team of 170 dedicated professionals, across United Kingdom, Canada, United States, India and Japan, who design, develop, sell and deliver Sigma ◆'s products and services. For more information, please visit www.sigma-systems.com
